

Installation Procedure:

1. Open the computer case.
2. Locate an empty available slot originally for use with HDD or CD-ROM drives.
3. Insert the transfer panel into the empty slot and fasten securely with screws provided.
4. Fasten the female DB37 (37 pin) connector to the metal bracket provided.
5. Insert the metal bracket into a vacant slot at the back of the computer.
6. Insert the male DB-37 (37 pin) connector into the female port.
7. Insert the male connectors for USB, microphone, speaker, line-in, game port (15 pin) and IEEE 1394 into the appropriate ports on the back of the computer.
